Building success with the business telephone leader

Two line telephones are a smart choice to enhance productivity in any business environment. A feature rich two line telephone at a surprisingly reasonable price is simply a smart solution.

Introducing the Model 9120 telephone from Aastra Telecom. With a sleek, simple compact design and the features needed by small and medium enterprise operations, the 9120 offers value not always found in lower priced telephones.

For starters, the 9120 is equipped with conference ability to have two callers on the line at the same time. Getting two people on a call at the same time can quickly solve a problem or create a new plan. The three line backlit adjustable display works with Caller ID and Call Waiting Display to provide detailed caller information and tell you who is calling while you are on the line. More information is provided via the LED display which flashes to indicate message waiting, extension in use and incoming call. In addition, the display can be used to review the 100 name and number Directory, the 100

name and number Callers List and the 10 number redial list.

When making or receiving calls, the Model 9120 provides the added flexibility of using the built in handsfree speakerphone or a headset. Useful options to free up your hands to take notes, check something on the computer or simply have a private conversation within a busy office.

For making fast and accurate calls, the Model 9120 features 14 autodial positions for saving frequently dialed numbers and a 10 number redial list. These positions can also be used to save telephone network feature access codes for ease of use. With on-hook dialing, you don't even have to lift the handset to make the call. Compatible with most business systems, and offering many more valuable features, the Model 9120 is at home in almost any business environment.

The Model 9120 – a smart solution for today's complex business environment.
